November 2009

To all General Practitioners

Dear Colleague

Did you know that we can offer Private Practice MRI and CT examinations within the West Wing at the John Radcliffe Hospital for all Neuroradiology and Specialist Surgery indications? We offer CT examinations for brain imaging, and all ENT disease including sinus disease. We offer a full range of MR examinations for brain and spinal indications, including high quality vascular imaging, and ENT disease.

The examinations are carried out by fully qualified Neuroradiographers under direct supervision of a Consultant Neuroradiologist. The department is a modern purpose built neuroradiology unit with a modern high end 1.5T Philips MR and 64 slice Toshiba CT scanner. The examinations are reported onto the ORH PACS system meaning that images and reports should be available almost instantaneously. A printed copy of the report and a CD of the examination will be forwarded to you within 24 hours of the examination being completed.

MRI sessions are available on Thursday afternoons (currently). CT examinations are available on Friday and as required on an ad-hoc basis.

There is a dedicated team based within Neuroradiology at the West Wing responsible for the organisation of Private Patient examinations. Sarah Quinby, clerical and admin manager, will be the point of contact for all requests and queries. Patients should receive their appointment within 24 to 48 hours of the request being received. Private patients will also be able to park on site for free; this is an initiative that has been provided by the Private Patient Office.

We hope that this new service will be of interest to you and colleagues.

Best wishes

Yours sincerely

Drs Anslow; Cellerini; Corkill; Kueker; Pretorius and Quaghebeur – Consultant Neuroradiologists

Partners: Philip Anslow; Martino Cellerini; Rufus Corkill; Wilhelm Kueker; Pieter Pretorius;
Gerardine Quaghebeur
